STAINLESS STEEL TROLLEY FOR WASTE, VERSION A

Technical features:

1. Structure in AISI 304 stainless steel made with a completely stainless steel tube structure, brushed weldings and BA finish
2. Compartment with opening front door with stainless steel handle for correct handling of the container.
3. Container with stainless steel top lid that can be opened by means of a front pedal lever and a rigid frame for fixing the plastic bag by means of a black rubber band.
4. Handles in black painted steel
5. With 2 mobile front wheels and 2 rear pads made of non-slip rubber.

Extra price for elastic silicone bag lock

STAINLESS STEEL TROLLEY FOR WASTE, VERSION A / A

Technical features:

1. Structure in AISI 304 stainless steel made with a completely stainless steel tube structure, brushed weldings and BA finish
2. Compartment with opening front door with stainless steel handle for correct handling of the container.
3. Container with stainless steel top lid that can be opened by means of a front pedal lever and a rigid frame for fixing the plastic bag by means of a black rubber band.
4. Stainless steel handles
5. With 2 mobile front wheels and 2 rear pads made of non-slip rubber.

Extra price for elastic silicone bag lock

CONTAINER FOR RECYCLING WITH 2 COMPARTMENTS CODE ISN 35250

Technical features:

- Structure in stainless steel AISI 403 and BA polished finish
- Dimensions 450x360x710 h mm - 90 Liters
- Interior divided into 2 compartments of 45L each one.
- Each compartment has firm plastic pliers
- Container complete with top cover that can be opened manually
- With N° 4 wheels Ø50 mm with galvanized metal support and thermoplastic rubber rotating part.

Extra price for n° 4 gray rubber wheels with stainless steel support, 2 with parking brake

Extra price for n° 4 wheels in white Nylon with stainless steel support, 2 with parking brake

CONTAINER FOR RECYCLING WITH 3 COMPARTMENTS CODE ISN35255

Technical features:

- Structure in stainless steel AISI 430 and satin finish.
- Dimensions 550x360x690 h mm - 58 Liters
- Internal divided into 2 compartments with removable plastic buckets of 15 Liters each one.
- Each compartment is fitted with an openable stainless steel top cover.
- In the lower part compartment for storing bags and other accessories. Complete with sliding door closure.
- With n° 4 wheels Ø50 mm with galvanized metal support and thermoplastic rubber rotating part.

Extra price for 4 gray rubber wheels with stainless steel support, 2 with parking brake

Extra price for 4 wheels in white Nylon with stainless steel support, 2 with parking brake

CONTAINER FOR RECYCLING WITH 4 COMPARTMENTS CODE ISN35267

Technical features:

- Structure in stainless steel AISI 430 and satin finish
- Dimensions 560x350x880 h mm
- Total volume 72 Liters
- Upper part divided into 2 compartments with removable plastic buckets of 18 Liters each one.
- Upper compartment equipped with a stainless steel lid that can be opened manually.
- Lower part with tilting door divided into 2 compartments with 2 removable plastic buckets of 18 Liters each one.
- With n° 4 wheels Ø 36 mm with galvanized metal support and double rubber rotating wheels

Extra price for 4 gray rubber wheels with stainless steel support, 2 with parking brake

Extra price for 4 wheels in white Nylon with stainless steel support, 2 with parking brake

CONTAINER FOR RECYCLING WITH 4 COMPARTMENTS COD. ISN532 / A

Technical features:

- Structure in stainless steel AISI 430 and BA polished finish
- Dimensions 360x460x700 h mm
- Possibility of having a single compartment of 66 liters or division into 2 containers for the collection of waste of 33L each one, or division into 3 containers for the collection of waste from 22L each one.
- Container complete with stainless steel top cover that can be opened by means of a front pedal linkage and rigid frame for fixing a plastic bag by means of a black rubber elastic.

Container with 1 compartment

Container with 2 compartments

Container with 3 compartments

Extra price for stainless lower cart on wheels in black rubber
