## SUPPORTS

### Wall supports

Numerous, of various sizes, the wall supports satisfy every storage need by accepting the equipment for storing the various materials.

Wall supports offer the possibility to store all types of baskets cleanly as they are raised.

These can be fixed directly to the wall, or be slightly spaced.

The wall supports, do not have ground support and this is an advantage for cleaning. All supports fully meet the requirements of hospital hygiene:

Screw heads are not visible, supports are closed with plugs at both ends, supports are provided with anti-static fixings. The spaces between two wall-mounted supports and those of an operating room trolley are exactly the same to facilitate the preparation of the trolleys.

Space between supports	Number of supports	Section length (mm)	Code
215	4	900	<b>7500189</b>
	6	1300	<b>7500190</b>
