

STAINLESS STEEL SUPPLY

Made in Italy

The Company

Born in 2000, **ISN Technology** is a company that, thanks to the decades-long experience of its founder in the field of production systems for the pharmaceutical industry, produces and sells components in stainless steel AISI 441 - AISI 304 - AISI 316 for the field of **pharmaceuticals**, **chemicals**, **homeopathic**, **cosmetics** and **food products**.

Our technical office offers complete support from the development of the individual item to the study and design of the turnkey project.

We supply furniture, accessories and equipment for every area of the company: from the locker room to the production areas, both classified and sterile, up to the warehouse. Every accessory we produce is designed and selected to answer the manufacturing specifications set forth in CGMP norms and the materials used conform to FDA directives.

Our quality standards are our reference point; the quality of the materials, ease of cleaning, accurate design and the possibility of customization have always constituted an integral part of **ISN Technology's** quality offer.

**We have the answer
to all your needs!**
