

# ISN CLEAN DRAINS SYSTEMS

Complete drain well

Removable internal filter

Internal siphon removal

## Internal siphon

### FEATURES:

- Reduced dimensions and reduced amount of water inside
- Removable, washable and repositionable inside the drain well with clean water or disinfectant
- Position 1: upper perimeter gasket to guarantee the seal with the drain well on the ground
- Position 2: rubber seal with internal siphon closure. Thanks to this seal, the water inside does not remain in contact with any foliar miasms

## Floor drain well

### FEATURES:

- Washable and removable in its entirety
- No interstice on the fund
- With side discharge the lower part is flush with the water drain pipe to ensure complete drainage without stagnation
- Adjustable in height for a perfect levelling with the floor during positioning
